Authorized to work in the US under TN status

Experience

Global Solutions Team

Jan – Aug 2024

Web Developer Intern – American Airlines, Fanatics, Flying Blue

Remote

- Shipped ticketing-platform features across **3 Fortune 500 clients** (American Airlines, Fanatics, Flying Blue) processing transactions for millions of users; navigated ambiguous requirements across distinct business domains
- Designed **6 reusable Vue.js components** with Vuex state management that standardized UI patterns across all client codebases, compressing future delivery timelines
- Owned the design-to-ship cycle end-to-end in cross-functional sprints, pushing back on specs when faster solutions existed

GoDaddy

May – Aug 2023

Software Development Engineer Intern

Remote

- Led **3 features from spec to production** in developer tooling used daily by **200+ engineers**; **2 adopted into Q3 roadmap** after pitching to engineering leadership
- Identified **8 UX bottlenecks** via user feedback and usage data; shipped fixes same-sprint, cutting task-completion time on critical paths
- Productionized full-stack features in **React**, **TypeScript**, and **Go** across frontend, API, and backend layers

TD Bank

May – Aug 2022

Software Engineer Intern

Remote

- Built self-serve provisioning features for a **Messaging Platform-as-a-Service**, eliminating manual bottlenecks and unblocking internal teams at enterprise scale
- Authored **Spring Boot** microservices and REST APIs within a service-oriented architecture; launched **Angular** components through a regulated CI/CD pipeline meeting financial compliance standards

Projects

IntelliApply | *Next.js 15, TypeScript, Tailwind, Prisma, PostgreSQL, LLM API*

[Live](#) · [GitHub](#)

- Built an **AI-native** resume-job matcher: **LLM API** integration scores fit percentage, surfaces skill gaps, and generates tailored cover letters with response caching to manage cost and latency at the prompt layer
- Implemented OAuth, React Server Components with SSR, and type-safe **Prisma ORM** over **PostgreSQL**; deployed on **Railway** with CI

Spectator | *TypeScript, Go, React 19, WebSockets, PostgreSQL, Docker, Fly.io*

[Live](#) · [GitHub](#)

- Architected a production-grade session-replay system: **TypeScript SDK** (12 KB gzipped) capturing DOM mutations with sub-ms overhead, paired with a **Go WebSocket server** using goroutine-per-connection concurrency and **PostgreSQL JSONB** for event persistence
- Built a **React 19** replay player with click heatmaps, conversion funnels, and real-time fan-out; deployed via **distroless Docker** (3 MB) on **Fly.io** **HA** + Vercel with CI for race-condition tests, typecheck, and Playwright E2E

Education

Toronto Metropolitan University

Toronto, Canada

BSc (Honours) Computer Science – Dean's Honours List, Scotiabank Career Builder Award

Sept 2020 – June 2025

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, Java, SQL

Frontend: React 19, Next.js 15, Vue.js, Angular, Vuex, Tailwind CSS, Server-Side Rendering

Backend & Infrastructure: Node.js, Spring Boot, Flask, PostgreSQL, WebSockets, Docker, GCP, Vercel, Railway, OAuth 2.0, CI/CD, Microservices, Event-Driven Architecture

AI & Tools: LLM Integration, Prompt Engineering, Cursor, Claude, AI-Assisted Development, System Design, REST APIs, Git, Agile/Scrum

Leadership

Women in Computer Science | Toronto Metropolitan University

May 2023 – Apr 2025

- Co-President** ('23-'24) and **VP Outreach** ('24-'25): led 8 executives delivering workshops and technical events for **200+ students**; grew attendance **40%** via targeted outreach and secured 3 industry sponsorships
